

# INTERNSHIP @ VISUAL CONTRACTS ENGLISH

## About Visual Contracts

Visual Contracts makes contracts accessible from a design and proactive law perspective. Visualization and understandable language are a crucial part of these contracts. The founder of Visual Contracts, Lieke Beelen, studied Design for Interaction at the Faculty of Industrial Design Engineering in Delft. She graduated in 2012 and first worked as a design researcher/UX designer at Essense Service design, then went freelancing with visual thinking and UX design assignments, before being awarded the Hague Innovator Award in 2015 together with a lawyer. With this prize, she has conducted research into privacy on the internet together with the lawyer and has redesigned Facebook's privacy statement with these insights. This is still a design that is ahead of the market, in which understandable language, visualization/web infographics and UX design are used to make legal content more understandable and accessible and thereby activate people around awareness about legislation and making good agreements.

In 2017, Lieke founded Visual Contracts as a platform that brings together lawyers and designers to make law, and specifically contracts, more accessible. To do this, it offers the insights, knowledge and tools to further develop and deploy 'legal design thinking' and make visual contracts scalable. In order to make the law accessible and to be able to build lasting relationships.

## Master internship - Allround legal design intern (6 months)

As an allround legal design intern you will support our founder Lieke with all sorts of legal design projects, marketing and sales and the overall business development. You will learn about what legal design thinking entails and what visual and proactive contracts are and will help create visual contracts yourself.
